# Vertican File and Server (VTFS)

- VTFS is a standard and automation process designed to increase law firm efficiency when filing and/or serving
- Works with DocIDs
  - Tools available to make initial setup a breeze
- Seamless integration with vMedia to generate document packages
- Fully integrates with Collection-Master workflow tools like Field Level Events, Smart Docs, Diary, and other automation
- Bi-directional FTP processes with our file and serve partners
- Saves boatloads of time
